1980

Nel 1980 l'Arch. Raffaella Vecchi disegna la serie ARCANA, un prodotto icona classico e storico che apre nuovi orizzonti nei mercati esteri, che si sviluppano passando anche attraverso la creazione di una filiale in Germania nel 1991.

In 1980 the Architect Raffaella Vecchi, designed the ARCANA series, a classical and historical icon that opens up new horizons in foreign markets, which also led to the establishment of a daughter company in Germany in 1991.

1981

Dal lavoro di sviluppo interno coordinato da Daniele Sirini, nasce la prima cartuccia a dischi ceramici monocomando. Il nuovo BLITZ apre la gloriosa storia delle serie di miscelazione Cisal.

The first single handle ceramic disc cartridge was developed internally by Daniele Sirini and his team. The glorious history of Cisal mixer series begins with the new BLITZ series.

VANTAGGI ACCIAIO INOSSIDABILE

L'acciaio inossidabile è un materiale nobile noto per le sue caratteristiche di punta.

- **Durabilità**

Gli elementi di lega dell'acciaio inossidabile formano sulla superficie un sottile, trasparente strato passivante che si autorigenera immediatamente in presenza dell'ossigeno contenuto nell'acqua e nell'aria, continuando a proteggere la superficie del materiale.

- **Riciclabilità**

Scegliere l'acciaio inossidabile significa coniugare prestazioni e protezione delle risorse naturali. Infatti l'industria dell'acciaio ha un eccellente primato ambientale: economizza nell'uso di energia primaria, risparmia le risorse non rinnovabili e riduce gli scarti.

- **Igiene, resistenza alla corrosione**

L'acciaio inossidabile è facile da pulire, per questa ragione viene normalmente scelto nelle industrie alimentari e del catering.
Naturalmente tutti i materiali usati in casa hanno bisogno di manutenzione e l'acciaio inossidabile non fa eccezione a questa regola.
L'acciaio può essere facilmente pulito e l'eccellente resistenza alla corrosione è di estrema importanza. Tuttavia è molto importante eseguire questa operazione con cura e tramite l'uso di prodotti adatti che non danneggino il film passivante peculiare del materiale.

COME PULIRE L'ACCIAIO?

Per mantenere le superfici in acciaio inossidabile in condizioni ottimali, è necessaria un'ordinaria manutenzione e pulizia, così che l'aspetto estetico, ma soprattutto la resistenza alla corrosione, non siano compromessi.

Suggerimenti

• Spruzzi di malta e tracce di cemento: possono essere trattate con cautela con una soluzione contenente una piccola quantità d'acido fosforico. Risciacquare con acqua deionizzata ed asciugare.

• Polvere di ferro creatasi durante le operazioni di saldatura, taglio, foratura e molatura, arrugginisce velocemente, quindi deve essere rimossa immediatamente poiché, oltre ad arrugginirsi, può intaccare lo strato passivante dell'acciaio inossidabile.

• I prodotti di pulizia più sicuri ed efficaci sono l'acqua saponata o un detergente blando. Per le macchie più resistenti sono adatti prodotti in crema non aggressivi:

• Calcare: se i prodotti in crema non sono sufficienti, trattare il calcare con una soluzione che contenga acqua molto calda e il 25% (1/4) di aceto, far agire per qualche ora. poi, risciacquare abbondantemente con acqua e bicarbonato di sodio, in seguito con acqua pulita ed asciugare con cura.

Da evitare

L'importante è evitare prodotti che contengono CLORURI, specialmente acido cloridrico, ammoniaca, CANDEGGINE o disinfettanti contenenti candeggina a base di acido ipoclorico. Se queste vengono accidentalmente versate su qualsiasi superficie inox, devono essere risciacquate abbondantemente con acqua pulita.
Evitare anche i prodotti usati per pulire l'argento, spugne e prodotti abrasivi.

VANTAGGI ACCIAIO INOSSIDABILE

L'acciaio inossidabile è un materiale nobile noto per le sue caratteristiche di punta.

- **Durabilità**

Gli elementi di lega dell'acciaio inossidabile formano sulla superficie un sottile, trasparente strato passivante che si autorigenera immediatamente in presenza dell'ossigeno contenuto nell'acqua e nell'aria, continuando a proteggere la superficie del materiale.

- **Riciclabilità**

Scegliere l'acciaio inossidabile significa coniugare prestazioni e protezione delle risorse naturali. Infatti l'industria dell'acciaio ha un eccellente primato ambientale: economizza nell'uso di energia primaria, risparmia le risorse non rinnovabili e riduce gli scarti.

- **Igiene, resistenza alla corrosione**

L'acciaio inossidabile è facile da pulire, per questa ragione viene normalmente scelto nelle industrie alimentari e del catering.
Naturalmente tutti i materiali usati in casa hanno bisogno di manutenzione e l'acciaio inossidabile non fa eccezione a questa regola.
L'acciaio può essere facilmente pulito e l'eccellente resistenza alla corrosione è di estrema importanza. Tuttavia è molto importante eseguire questa operazione con cura e tramite l'uso di prodotti adatti che non danneggino il film passivante peculiare del materiale.

COME PULIRE L'ACCIAIO?

Per mantenere le superfici in acciaio inossidabile in condizioni ottimali, è necessaria un'ordinaria manutenzione e pulizia, così che l'aspetto estetico, ma soprattutto la resistenza alla corrosione, non siano compromessi.

Suggerimenti

• Spruzzi di malta e tracce di cemento: possono essere trattate con cautela con una soluzione contenente una piccola quantità d'acido fosforico. Risciacquare con acqua deionizzata ed asciugare.

• Polvere di ferro creatasi durante le operazioni di saldatura, taglio, foratura e molatura, arrugginisce velocemente, quindi deve essere rimossa immediatamente poiché, oltre ad arrugginirsi, può intaccare lo strato passivante dell'acciaio inossidabile.

• I prodotti di pulizia più sicuri ed efficaci sono l'acqua saponata o un detergente blando. Per le macchie più resistenti sono adatti prodotti in crema non aggressivi:

• Calcare: se i prodotti in crema non sono sufficienti, trattare il calcare con una soluzione che contenga acqua molto calda e il 25% (1/4) di aceto, far agire per qualche ora. poi, risciacquare abbondantemente con acqua e bicarbonato di sodio, in seguito con acqua pulita ed asciugare con cura.

Da evitare

L'importante è evitare prodotti che contengono CLORURI, specialmente acido cloridrico, ammoniaca, CANDEGGINE o disinfettanti contenenti candeggina a base di acido ipoclorico. Se queste vengono accidentalmente versate su qualsiasi superficie inox, devono essere risciacquate abbondantemente con acqua pulita.
Evitare anche i prodotti usati per pulire l'argento, spugne e prodotti abrasivi.

VANTAGGI ACCIAIO INOSSIDABILE

L'acciaio inossidabile è un materiale nobile noto per le sue caratteristiche di punta.

- **Durabilità**

Gli elementi di lega dell'acciaio inossidabile formano sulla superficie un sottile, trasparente strato passivante che si autorigenera immediatamente in presenza dell'ossigeno contenuto nell'acqua e nell'aria, continuando a proteggere la superficie del materiale.

- **Riciclabilità**

Scegliere l'acciaio inossidabile significa coniugare prestazioni e protezione delle risorse naturali. Infatti l'industria dell'acciaio ha un eccellente primato ambientale: economizza nell'uso di energia primaria, risparmia le risorse non rinnovabili e riduce gli scarti.

- **Igiene, resistenza alla corrosione**

L'acciaio inossidabile è facile da pulire, per questa ragione viene normalmente scelto nelle industrie alimentari e del catering.
Naturalmente tutti i materiali usati in casa hanno bisogno di manutenzione e l'acciaio inossidabile non fa eccezione a questa regola.
L'acciaio può essere facilmente pulito e l'eccellente resistenza alla corrosione è di estrema importanza. Tuttavia è molto importante eseguire questa operazione con cura e tramite l'uso di prodotti adatti che non danneggino il film passivante peculiare del materiale.

COME PULIRE L'ACCIAIO?

Per mantenere le superfici in acciaio inossidabile in condizioni ottimali, è necessaria un'ordinaria manutenzione e pulizia, così che l'aspetto estetico, ma soprattutto la resistenza alla corrosione, non siano compromessi.

Suggerimenti

• Spruzzi di malta e tracce di cemento: possono essere trattate con cautela con una soluzione contenente una piccola quantità d'acido fosforico. Risciacquare con acqua deionizzata ed asciugare.

• Polvere di ferro creatasi durante le operazioni di saldatura, taglio, foratura e molatura, arrugginisce velocemente, quindi deve essere rimossa immediatamente poiché, oltre ad arrugginirsi, può intaccare lo strato passivante dell'acciaio inossidabile.

• I prodotti di pulizia più sicuri ed efficaci sono l'acqua saponata o un detergente blando. Per le macchie più resistenti sono adatti prodotti in crema non aggressivi:

• Calcare: se i prodotti in crema non sono sufficienti, trattare il calcare con una soluzione che contenga acqua molto calda e il 25% (1/4) di aceto, far agire per qualche ora. poi, risciacquare abbondantemente con acqua e bicarbonato di sodio, in seguito con acqua pulita ed asciugare con cura.

Da evitare

L'importante è evitare prodotti che contengono CLORURI, specialmente acido cloridrico, ammoniaca, CANDEGGINE o disinfettanti contenenti candeggina a base di acido ipoclorico. Se queste vengono accidentalmente versate su qualsiasi superficie inox, devono essere risciacquate abbondantemente con acqua pulita.
Evitare anche i prodotti usati per pulire l'argento, spugne e prodotti abrasivi.

PFLEGEANWEISUNG

Die Sonderoberflächen unserer Produkte, sind für den Armaturenbereich mit geeignetsten Materialien hergestellt. Diese Verfahren werden mit modernen Qualitätssicherungs-Methoden ständig überwacht.
Wasser ist ein Lebenselixier, das je nach Lage Ihres Standortes mehr oder weniger Kalk enthält. Nach dem Verdunsten der Wassertropfen auf der Oberfläche des Produktes bleiben Flecken zurück. Es bedarf nur wenig Mühe, dies zu verhindern. Sie sparen sich im Endeffekt Arbeit, wenn Sie es sich zur Gewohnheit machen können, gleich nach der Benutzung des Produktes , dieses z.B. mit einem Handtuch trocken zu wischen. So werden Sie immer über ein sauberes Produkt verfügen. Sollte es dennoch vorkommen, dass Ihr Produkt gesäubert werden muss, so ist es bei leichten Verschmutzungen völlig ausreichend die Oberfläche mit Seife und einem nassen Lappen zu reinigen, abzuspülen und mit einem weichen Tuch trocken zu reiben.
Hartnäckige Verschmutzungen wie Kalkablagerungen entfernen Sie am besten mit **MASTER LIBBY. MASTER LIBBY,** der Intensivreiniger für unsere Produkte, ist bei hoher Wirkung schonend und materialverträglich. Die Anwendung ist einfach: Auftragen, kurz einwirken lassen, gründlichst mit klarem Wasser abspülen und danach die Armatur trocken reiben. Die Reinigung und Pflege der Umsteller und beweglichen Teile müssen bei Bedarf vom Benutzer durchgeführt werden.
Die Pflegetätigkeit ist von der Garantie ausgeschlossen.
Achtung: Master Libby führt bei Kontakt mit Marmor, Granit und ähnlichen Natursteinen zu Korrosionserscheinungen und ist daher nicht mit diesen Materialien in Berührung zu bringen. Sie erhalten dieses Produkt unter der Artikelnummer ZA 00800 0 00 bei Ihrem Installateur.

Besonderer Hinweis: Für die Reinigung unserer Produkte dürfen Sie auf keinen Fall kratzende Schwämme, Scheuermittel, säurehaltige Reiniger, Salzsäure, alkoholhaltige Mittel oder Lösungsmittel verwenden!!

CONDICIONES DE MANTENIMIENTO

El acabado superficial de nuestros productos está realizado según métodos experimentados y mediante la utilización de una tecnología de vanguardia.
Las ejecuciones están constantemente controladas para asegurar la elevada calidad de nuestros productos. Para conservar durante el mayor tiempo posible el acabado superficial y para prevenir la formación de manchas de cal se deben observar algunas reglas.
El agua contiene cal que se deposita sobre las superficies de los grifos formando manchas antiestéticas.
Si fuese necesario limpiar los productos, será suficiente, en caso de ligera suciedad, utilizar jabón o un trapo húmedo, enjuagar y secar con un paño o en el caso de que los depósitos fuesen más consistentes (residuos de cal) será posible eliminarlos con **MASTER LIBBY.**
MASTER LIBBY es un detergente muy eficaz específico para nuestros productos, que no contamina el medio ambiente y limpia sin atacar el material. Su aplicación es muy sencilla: se deja actuar el detergente durante unos minutos, se enjuaga cuidadosamente en agua corriente y, finalmente, se seca el producto con un trapo.
Limpieza y mantenimiento de los dispositivos de funcionamiento (desviadores y partes en movimiento) tienen que ser efectuadas, si necesario, por el usuario. El mantenimiento no está incluido en la garantía.
¡Cuidado: MASTER LIBBY en contacto con mármol y granito provoca corrosión! La referencia para pedir **MASTER LIBBY** es ZA 00800 0 00.
