SCARICO A VORTICE
Vortex flush

I sanitari con scarico a vortice sono l'ultima importante evoluzione tecnologica dei sistemi di scarico dei water: garantiscono un risciacquo efficace, una riduzione del consumo idrico, una manutenzione semplificata e una maggiore silenziosità.

Il sistema a vortice si distingue per la modalità di immissione dell'acqua nel vaso. Mentre gli scarichi tradizionali utilizzano un flusso discendente, questo metodo genera un movimento circolare dell'acqua, per un risciacquo a spirale, che consente di coprire uniformemente la superficie interna del vaso, migliorando l'efficacia della prestazione igienica.

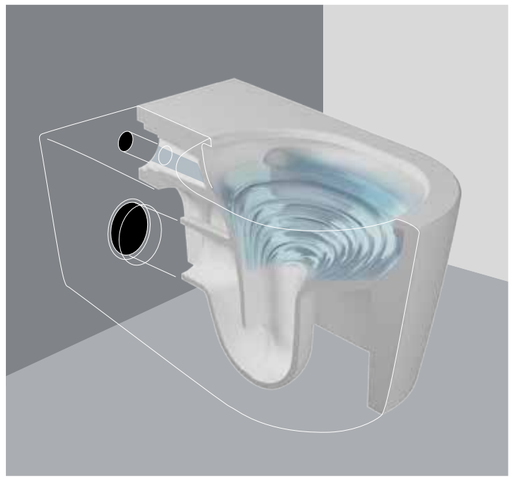

Sanitary ware with vortex flush is the latest major technological evolution in toilet flushing systems: it guarantees effective rinsing, reduced water consumption, simplified maintenance and greater silence.

The vortex system is distinguished by the way water is introduced into the bowl. While traditional flushes use a downward flow, this method generates a circular movement of the water, for a spiral rinse, which allows the internal surface of the bowl to be uniformly covered, improving the effectiveness of the hygienic performance.

Los sanitarios con descarga vórtex son la última evolución tecnológica importante en los sistemas de descarga de inodoros: garantizan un enjuague eficaz, un consumo de agua reducido, un mantenimiento simplificado y un mayor silencio.

El sistema de vórtice se distingue por la forma en que se introduce el agua en el jarrón. Mientras que las descargas tradicionales utilizan un flujo descendente, este método genera un movimiento circular de agua, para un enjuague en espiral, que permite una cobertura uniforme de la superficie interna del inodoro, mejorando la efectividad del desempeño higiénico.

Le dimensioni dei lavelli possono variare del +/-2%, si raccomanda di effettuare i tagli e gli aggiustamenti sul mobile solo dopo aver ricevuto il lavello.

Due to +/-2 ceramic dimension tollerance, it is recommended that the cabinet makers wait until the sink is delivered before making the cabinet.

A causa de la tolerancia de la ceràmica +/- 2%, se recomienda que el fabricante de muebles espere a que se entregue el fregadero antes de hacer el mueble.
